Art Unit: 1632

This Application is a 371 of PCT/US04/10686, filed April 7, 2004 and claims priority to US Provisional application 60/461,016, filed April 7, 2003.

Claims 1-37 are pending.

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1-24, 30, 35-37, drawn to a method of identifying a therapeutic target.

Group 2, claim(s) 25-29, 31, 32, 36, 37, drawn to a method for identifying an agent that alters a physiological pathway.

Group 3, claim(s) 33, drawn to an mRNP-complex associated with glucose or lipid metabolism.

Group 4, claim(s) 34, drawn to a method for identifying a component of an mRNP complex.

The inventions listed as Groups 1-4 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature, mRNP complexes, were known at the time of filing. Phelps, "Innovative Systems Biology" November 6, 2002, url: http://www.ribonomics.com/news/presentations/ribonomics, RNA in Drug

Art Unit: 1632

Development, teaches a method for the identification of therapeutic targets which is based on the comparison of mRNP composition in different cellular states (e.g. diseased vs. healthy). See search report of January 11, 2005 for PCT US 2004/010686.

The claims are further restricted.

Claim 1 of Group 1 is drawn to measuring protein or RNA and one must be elected.

Claim 4 of Group 1 is drawn to a disease that is related to glucose or lipid metabolism and one must be elected.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Claims 2 and 3 of Group 1 are drawn to specifically named cells in which phenotypes are seen and one cell must be elected.

Claim 8 of Group 1 is drawn to specifically named agents and one must be elected.

Claims 12, 13, 16, 17 of Group 1 are drawn to proteins within an mRNP complex and one must be elected.

Claim 29 of Group 2 is drawn to two types of pathways that are altered by an agent and one must be elected.

Art Unit: 1632

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The following claim(s) are generic:

Claims 1, 2, 4-24, 30, 35-37 of Invention 1 are generic for the type of cell in which the method of identifying a therapeutic target is carried out.

Claims 1-24, 30, 35-37 of Invention 1 are generic for agents that alter at least one component of the glucose or lipid pathway.

Claims 1-24, 30, 35-37 of Invention 1 are generic for proteins within an mRNP complex.

Claims 25-29, 31, 32, 36, 37 of Invention 2 are generic for the physiological pathway altered by an agent.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

Art Unit: 1632

requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

MPEP 1893.03(d) states: If an examiner (1) determines that the claims lack unity of invention and (2) requires election of a single invention, when all of the claims drawn to the elected invention are allowable (i.e., meet the requirements of 35 U.S.C. 101, 102, 103 and 112), the nonelected invention(s) should be considered for rejoinder. Any nonelected product claim that requires all the limitations of an allowable product claim, and any nonelected process claim that requires all the limitations of an allowable process claim, should be rejoined. See MPEP § 821.04 and § 821.04(a). Any nonelected processes of making and/or using an allowable product should be considered for rejoinder following the practice set forth in MPEP § 821.04(b).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joanne Hama, Ph.D. whose telephone number is 571-272-2911. The examiner can normally be reached Mondays, Tuesdays, Thursdays, and Fridays from 9:00-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter Paras, can be reached on 571-272-4517. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to (571) 272-0547.

Patent applicants with problems or questions regarding electronic images that can be viewed in the Patent Application Information Retrieval system (PAIR) can now contact the USPTO's Patent Electronic Business Center (Patent EBC) for assistance. Representatives are available to answer your questions daily from 6 am to midnight (EST). The toll free number is (866) 217-9197. When calling please have your application serial or patent number, the type of document you are having an image problem with, the number of pages and the specific nature of the problem. The Patent Electronic Business Center will notify applicants of the resolution of the problem within 5-7 business days. Applicants can also check PAIR to confirm that the problem has been corrected. The USPTO's Patent Electronic Business Center is a complete service center supporting all patent business on the Internet. The USPTO's PAIR system provides Internet-based access to patent application status and history

NOTICE TO COMPLY WITH REQUIREMENTS FOR PATENT APPLICATIONS CONTAINING NUCLEOTIDE SEQUENCE AND/OR AMINO ACID SEQUENCE DISCLOSURES

Applicant must file the items indicated below within the time period set the Office action to which the Notice is attached to avoid abandonment under 35 U.S.C. § 133 (extensions of time may be obtained under the provisions of 37 CFR 1.136(a)).

satide and/or amine said easy, and disclosure contained in this application de The nucl comply following

cleotide and/or amino acid sequence disclosure contained in this application does not with the requirements for such a disclosure as set forth in 37 C.F.R. 1.821 - 1.825 for the g reason(s):
1. This application clearly fails to comply with the requirements of 37 C.F.R. 1.821-1.825. Applicant's attention is directed to the final rulemaking notice published at 55 FR 18230 (May 1,1990), and 1114 OG 29 (May 15, 1990). If the effective filing date is on or after July 1, 1998, see the final rulemaking notice published at 63 FR 29620 (June 1, 1998) and 1211 OG 82 (June 23,1998).
2. This application does not contain, as a separate part of the disclosure on paper copy, a "Sequence Listing" as required by 37 C.F.R. 1.821(c).
3. A copy of the "Sequence Listing" in computer readable form has not been submitted as required by 37 C.F.R. 1.821(e).
4. A copy of the "Sequence Listing" in computer readable form has been submitted. However, the content of the computer readable form does not comply with the requirements of 37 C.F.R. 1.822 and/or 1.823, as indicated on the attached copy of the marked -up "Raw Sequence Listing".
5. The computer readable form that has been filed with this application has been found to be damaged and/or unreadable as indicated on the attached CRF Diskette Problem Report. A Substitute computer readable form must be submitted as required by 37 C.F.R. 1.825(d).
6. The paper copy of the "Sequence Listing" is not the same as the computer readable from of the "Sequence Listing" as required by 37 C.F.R. 1.821(e).
7. Other: The specification and claims comprise sequences which have not been assigned SEQ ID NOs. For example, claim 32 comprises sequences which require SEQ ID NOs. and page 51 of the specification describe sequences that have no SEQ ID NOs assigned to them. SEQ ID NOs must be assigned to each sequence in the application. Further, each SEQ ID NO. must be provided in computer readable format (CRF) and on paper and a statement indicating that the two are the same must be provided.
Applicant Must Provide:
An initial or <u>substitute</u> computer readable form (CRF) copy of the "Sequence Listing". (If the unidentified sequences are not provided on the CRF)
An initial or <u>substitute</u> paper copy of the "Sequence Listing", as well as an

Application/Control Number: 10/552,642 Page 9

Art Unit: 1632

amendment directing its entry into the specification. (If the unidentified sequences are not provided in the paper copy)

A statement that the content of the paper and computer readable copies are the same and, where applicable, include no new matter, as required by 37 C.F.R. 1.821(e) or 1.821(f) or 1.821(g) or 1.825(b) or 1.825(d). (If a new paper and/or CRF are required)

For questions regarding compliance to these requirements, please contact:
